

# LEE ZI ZUO 吕子卓

Class of 2027, Computer Science and Technology | zizuolee@gmail.com | +86-13661780725 | WeChat: nightskyblade

## Personal Profile

My name is Lee Zi Zuo (吕子卓), an international student from Malaysia. I have excellent bilingual communication skills, enabling smooth interactions with international friends. I also have experience in **full-stack development, LLM fine-tuning and data analytics**. In my free time, I enjoy sports and have participated in numerous competitions. During my university years, I have taken part in half-marathons, football, basketball and dragon-boat tournaments.

## Education

### Fudan University

Shanghai, China

Bachelor's Degree in Computer Science and Technology (Class of 2027)

Expected Graduation: July 2027

- **Relevant Courses:** Data Structures, Introduction to Computer Systems, **Object-Oriented Programming, Software Engineering**, Design and Analysis of Algorithms, Introduction to Databases, **Computer Network, Machine Learning**, Compilers, Computer Graphics, **Artificial Intelligence**

## Work Experience

### Bytedance

Shanghai, China

China Trading & Ads Department - DOU+ Team - Full Stack Developer Intern

05/2026 – 06/2026

- **Business Requirement Delivery:** Led the launch of **UX optimizations** and **features** such as “Assurance and Continuous Payment” functions, enhancing user experience and core product value, which **increase the user payment rate by 30%**.
- **Technical Debt Reduction & Codebase Optimization:** Standardized px/rem usage across the repository, improving front-end **maintainability** and **reducing inconsistent styling issue**.

### Bybit Fintech Limited

Remote

Trading Team - Unified Frontend Intern

09/2025 – 03/2026

- **Frontend Development:** Collaborated with product managers, UI/UX designers and backend engineers on iterative development for **Spot & Options & Futures trading platform**. Contributed to **several P-1 cross-functional requirements** such as Tradfi Web, RFQ, Unified Order Center and Unified Trading Platform.
- **User Behaviour Tracking:** Integrate event tracking tools into trading platform to capture key user behaviour, and assist in building analytics dashboards to provide data-driven insights.
- **Web Load Rate Optimization:** Fix unnecessary re-renders bugs from components to help stabilize the web load rate.

### AnyHelper International

Shanghai, China

AI Department - AI Full Stack Developer Intern

03/2025 - 10/2025

- **Full-Stack Development:** Designed and developed Chrome extension, web (Flask/FastAPI) and desktop (PyQt5) apps to automate resume screening, matching, and multi-platform uploads (LinkedIn, Liepin, MaiMai, BOSS).
- **AI & Fine-Tuning:** Built Excel→JSONL fine-tuning pipeline (**2,200+ labeled pairs, 9+ model variants**) achieving **~87%** match accuracy and improving quality **40–87%**.
- **Automation Engineering:** Created Selenium-based automation with anti-bot/page-by-page strategies, async processing, processed **1k+ resumes daily** (peaks 40k/month, 300k+ annually) with **95%+ success rate** and **99.5–99.9% uptime**.
- Reduced manual screening time **~85% (8h → ~1–2h)** and cut recruitment cycles by **~40%**.
- **Data Analytics:** Developed dashboards and analytics for **420k+ resumes** with **98% classification accuracy** for multi-category job roles.

## Certifications & Language Proficiency

### IELTS

Malaysia

Overall Score: 7.5 (Listening: 7.5, Reading: 8.0, Speaking: 7.0, Writing: 6.5), equivalent to CEFR C1 level.

01/2023

## Tech Stack

- **Programming & Scripting Languages:** Python, JavaScript (ES6+), TypeScript, C/C++, Bash/Shell, Git (version control)
- **AI & Machine Learning:** OpenAI API, LLM Fine-tuning, Prompt Design, Pandas, NumPy, Matplotlib
- **Frameworks & Libraries:** React.js, Vue.js, Express.js, Node.js, FastAPI, Flask, PyQt5
- **Full-Stack Web Development:** HTML5, CSS3, MERN Stack (MongoDB, Express.js, React.js, Node.js)
- **Automation:** Selenium, Chrome Extension API, AsyncIO, OpenPyXL
- **Databases:** MongoDB, MySQL, PostgreSQL, SQLite, IndexedDB
- **OS & Deployment:** Linux (Ubuntu), Docker, PyInstaller

## PROJECTS

### LLM Agent Memory System — Long-term Memory Architecture for AI Agents

Link: <https://github.com/ZiZuoLee/llm-agent-memory>

Lead Developer

12/2025

- Designed and implemented a **long-term memory architecture for LLM agents**, enabling persistent knowledge storage and retrieval across sessions.
- Developed an **agent workflow integrating LLM inference, memory recall, and dynamic context construction**.
- Optimized prompt construction by **retrieving top-k relevant memories**, reducing token usage while preserving context relevance.

### Notebook Application (Full-Stack Web Application)

**Link:** <https://github.com/ZiZuoLee/To-Do-List-App>

*Lead Developer*

*10/2024 – 11/2024*

- Built an online note-taking application using the **MERN stack**.
- Features including user registration, login/logout, dashboard, note creation/modification/deletion, and pinning notes.

### Discord Bot Development & Maintenance

*Lead Developer*

*01/2021- 01/2022*

- Self-learned **Python** and used various **Python libraries** to develop a Discord bot for chatting and monitoring study progress.
- Over **50 users** actively engaged with the bot.
- Continuously fixed bugs and optimized code.

### Activity Experience

#### CSDN C++ Summit

**Hongqiao, Shanghai, China**

*Event Volunteer*

*12/ 2024*

- Assisted CSDN staff in communicating with guest mentors and handling various conference matters.
- Had the opportunity to attend lectures given by top C++ experts in China and engage in discussions with them.

#### UBS GCC Greater China Conference

**Lujiazui, Shanghai, China**

*Event Helper*

*01/2024*

- Assisted UBS managers in connecting with financial clients (individual investors and partner companies).
- Used bilingual skills (Chinese & English) to facilitate communication and arrange meeting details between managers.
